Compliance Determination for Filtered Systems - Monthly Report

PWS INFORMATION

PWSID#: 4244001 PWS Name: RANDOLPH-HOEBROOK JOINT WATER PWS Town: RANDOLPH Treatment Plant Name: RANDOLPH WATER PLANT Reporting Period -> Month: AUGUST Year: 2019

TURBIDITY PERFORMANCE CRITERIA

1. Monthly Turbidity (95%) NTU Limit - The turbidity level of a system's filtered water must be less than or equal to the Monthly Turbidity NTU Limit in at least 95% of the measurements taken each month for the filtration technology used, otherwise SWTR TT Violation (Tier 2). 186 = A Total # of filtered water turbidity measurements for month (SWTR - Form F) 186 = B Total # of filtered water turbidity measurements less than or equal to the specified limits for the filtration technology used. 100 = (B/A) x 100 The percentage of turbidity measurements meeting the Monthly Turbidity 95% NTU Limit. 2. Max Day NTU Limit - The turbidity level of a system's filtered water must at no time exceed the Max Day NTU Limit for the filtration technology used, otherwise SWTR TT Violation (Tier 2). Record the date and turbidity value for any measurements exceeding the Max Day NTU. Check box [X] if "None"

DISINFECTION PERFORMANCE CRITERIA

1. Point-of-Entry Minimum Disinfectant Residual Criteria - Residual Disinfectant concentration cannot be < 0.2 mg/L for more than 4 hours. SWTR TT Violation (Tier 2). Minimum Disinfectant Residual at Point-of-Entry to Distribution System. Table with columns: Day, Cl2 mg/l, Day, Cl2 mg/l. Residual Measured: [X] Free Cl2, [] Total Cl2, [] Combined Cl2. If at any time the residual falls below 0.2 mg/l in the water entering the distribution system, the supplier of water must notify the Department as soon as possible, but no later than by the end of the next business day.

2. Distribution System Disinfectant Residual Criteria - Residual Disinfectant concentration (V) cannot be undetectable in greater than 5% of samples in a month, for any two consecutive months. SWTR TT Violation (Tier 2). Chlorine residuals must be measured at the same time and location as total coliform distribution routine & repeat samples. If no residual is detected, an HPC sample must be collected and analyzed.

Total # of HPC samples taken during month: 64 # HPC sites > 500/mL: 0 # HPC sites <= 500/mL: 64 # of sites where Cl2 residual measurements were made, whether a residual was detected or not (should be the same # of sites reported on your monthly DBPR Cl2 residual report) 0 # of sites HPC samples were analyzed instead of Cl2 residual measurements 0 # of sites where no Cl2 residual was detected and no HPC sample was analyzed 0 # of sites where no Cl2 residual was detected and HPC > 500 CFU/mL 0 # of sites where no Cl2 residual measurement was made and HPC > 500 CFU/mL

Water in the distribution system with a heterotrophic bacteria concentration (HPC) less than or equal to 500/mL, is deemed to have a detectable disinfectant residual for purposes of determining compliance with this requirement. When analyzed, report HPC results on your monthly DEP Bacteriological Report.

V = ((c+d+e)/(a+b)) x 100 This Month % V = 0 Previous Month % V = 0 Is V > 5% for 2 months? [] Yes or [X] No

certify under penalties of law that I am the person authorized to fill out this form and the information contained herein is true,

| Totals | | 186 | 186 | 0 |

May be used by systems serving less than 10,000 persons, subject to DEP approval.
Enter the Maximum Filtered Water Turbidity Result recorded each day, at the 4th hour or other approved interval.
Enter the Total # of Turbidity measurements taken for each day. Measurements must be taken at a minimum of 4-hour intervals (i.e. 6 readings per day).
If continuous monitors count each 4-hour period as 1 measurement. Record the actual turbidity result at the specified interval of time. Do not average turbidity measurements. If DEP approved, 15-minute readings (i.e. 96 readings per day) may be submitted. Filtered turbidity data must be kept on file for DEP review.
Enter the # of turbidity measurements taken and recorded in the previous column, enter the number of turbidity measurements that were less than or equal to the Monthly (95%) NTU Limit for the filtration technology used.
If at any time the filtered turbidity Max Day NTU Limit is exceeded, the DEP must be notified no later than the end of the next business day. For each exceedance, record the turbidity value(s) and date(s) on SWTR - Form G.

| 31 | 2,600 | 2.03 | 50 | 101.5 | 6.05 | 21.0 | 11 | 9.2 | <input type="checkbox"/> Yes |

1. Use a separate form for each disinfectant/sampling point. Enter disinfectant and sequence position, e.g. "ozone/1st" or "ClO₂/3rd". If more than one disinfectant sampling point, you must also complete SWTR Form H and calculate the cumulative inactivation ratio SUM (CTcalc/CT99.9) to determine compliance.
2. Peak hourly flow means the highest pumpage hour during the day, not the absolute peak flow at any instant.
3. The residual disinfectant concentration(s) ("C") of the water before or at the first customer must be measured each day during peak hourly flow.
4. The disinfectant contact time(s) ("T") must be determined for each day during peak hourly flow. The time T used in calculating CT, is the time it takes the water, during peak hourly flow, to move between the point of disinfection application and the point at which the residual is measured.
5. If the system uses free chlorine, the pH of the disinfected water must be measured at least once per day at each chlorine residual disinfectant concentration sampling point during peak hourly flow.
6. The temperature of the disinfected water must be measured at least once per day at each residual disinfectant concentration sampling point during peak hourly flow.
7. Use Inactivation Tables at 310 CMR 22.20A Tables 1.1 - 1.6, 2.1 and/or 3.1
8. The inactivation ratio (CTcalc/CT99.9) is determined before or at the first customer during peak hourly flow and if the (CTcalc/CT99.9) is < 1.0, the 99.9% *Giardia lamblia* inactivation requirement has not been achieved.
9. More than one "Yes" response above may indicate a SWTR Treatment Technique violation (Tier 2).

I certify under penalties of law that I am the person authorized to fill out this form and the information contained herein is true, accurate and complete to the best extent of my knowledge.

PWS INFORMATION

PWSID#: 4244001 PWS Name: RANDOLPH-HOLBROOK JOINT WATER PWS Town: Randolph
 Treatment Plant Name: RANDOLPH WATER PLANT Reporting Period → Month: AUGUST Year: 2019
 Total # of Filters at Treatment Plant¹: 8

MONTHLY REPORTING

Filtered Water Turbidity Measured: Individual Filter Effluent (IFE) or Combined Filter Effluent (CFE)²
 Analytical Method: SM 2130B EPA 180.1 GLI Method 2 (Great Lakes)

| | | |
|----|---|--|
| 1. | Was each filter monitored continuously? If continuous monitoring equipment is installed and if it functioned continuously throughout the month, the correct answer is "yes". If continuous monitoring equipment is not installed or did not function continuously throughout the month, the correct answer is "no". | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No |
| 2. | Were measurements recorded every 15 minutes? If measurements on each filter were performed throughout the month and the measurements were recorded every 15 minutes when water was being filtered, the correct answer is "yes". If there was a failure in any continuous monitor, the correct answer is "no". | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| 3. | Was there a failure of continuous turbidity monitoring equipment? If grab samples were obtained due to an equipment failure, the correct answer is "yes". If there was no equipment failure during the month, the correct answer is "no". Systems serving a population of at least 10,000 must conduct grab samples every 4 hours in lieu of continuous monitoring, but for no more than 5 working days following the failure of equipment. Systems serving a population less than 10,000 may use grab samples for up to 14 working days. List filter # and date(s) grab samples collected: Comment: | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <i>FILTERS ALL MONITORED ON AQUATREND WHERE NTUs ARE CHARTED/GRAPHED. THE PROGRAM THAT RECEIVES AND RECORDS THE NUMBERS FAILED AND HAD TO BE REBOOTED.</i> |
| 4. | Were individual filter levels greater than 1.0 NTU in two consecutive measurements? If "yes", systems serving a population of at least 10,000 must produce a filter profile within 7 days of the exceedance or report the obvious reason for the exceedance in the table below. The filter profile is not required to be submitted unless requested, only report that the filter profile has been done. Systems serving a population less than 10,000 shall report exceedance information in the table below. List date(s) a filter profile was produced: | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| 5. | Were individual filter levels greater than 0.5 NTU in two consecutive measurements after the filter has been online for more than 4 hours? If "yes", systems serving a population of at least 10,000 must produce a filter profile within 7 days of the exceedance or report the obvious reason for the exceedance in the table below. The filter profile is not required to be submitted unless requested, only report that the filter profile has been done. Systems that serve a population less than 10,000 have no required action. List date(s) a filter profile was produced: | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| 6. | Were individual filter levels greater than 1.0 NTU in two consecutive measurements in three consecutive months? If "yes", the system must conduct a self-assessment of the filter within 14 days of the exceedance. The system is to report that a self-assessment has been completed. Systems with 2 filters that monitor CFE in lieu of IFE must do both filters. Refer to 310 CMR 22.20D(6)(b)(2) and 310 CMR 22.20F(7)(d)(2) for required filter self-assessment report content. List date(s) a filter self-assessment was triggered: Report(s) Completed: | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| 7. | Were individual filter levels greater than 2.0 NTU in two consecutive measurements in two consecutive months? If "yes", systems serving a population of at least 10,000 must schedule a Comprehensive Performance Evaluation (CPE) within 30 days of the exceedance and submit the report within 90 days. A system serving a population less than 10,000 must schedule a CPE within 60 days of the exceedance and submit the report within 120 days. List date(s) the CPE was triggered: | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |

For each 'Yes' response to question #4, #5, #6 or #7 above: Report the following information in the table below.

| Filter # | Turbidity Result (NTU) | Date | Reason for Exceedance (if known) Attach additional documents as necessary for detailed explanations. |

- Systems shall conduct continuous turbidity monitoring of the filter effluent for each individual filter at the filtration facility and record turbidity measurements every 15-minutes. Record the actual turbidity result at the specified interval of time. Do not average turbidity measurements. Individual filter turbidity records must be retained for 3 years and kept on file for MassDEP review.
- Systems serving less than 10,000: If the treatment system has only one or two filters, the supplier may conduct continuous monitoring of the CFE turbidity in lieu of individual filter effluent (IFE) turbidity monitoring. If there are two filters, a continuous turbidity monitor can be installed on the combined filter effluent. If a CFE problem appears, follow-up action must then be completed on both filters.
- Enter the highest daily 15-minute interval turbidity measurement recorded for the filter specified.
- Enter the highest daily 15-minute interval turbidity measurement recorded at the end of the first four hours of continuous filter operation after the filter has been backwashed or otherwise taken offline.

I certify under penalties of law that I am the person authorized to fill out this form and the information contained herein is true, accurate and complete to the best extent of my knowledge.

Systems shall conduct continuous turbidity monitoring of the filter effluent for each individual filter at the filtration facility and record turbidity measurements every 15-minutes. Record the actual turbidity result at the specified interval of time. Do not average turbidity measurements. Individual filter turbidity records must be retained for 3 years and kept on file for MassDEP review.

Systems serving less than 10,000: If the treatment system has only one or two filters, the supplier may conduct continuous monitoring of the CFE turbidity in lieu of individual filter effluent (IFE) turbidity monitoring. If there are two filters, a continuous turbidity monitor can be installed on the combined filter effluent. If a CFE problem appears, follow-up action must then be completed on both filters.

Enter the highest daily 15-minute interval turbidity measurement recorded for the filter specified.

Enter the highest daily 15-minute interval turbidity measurement recorded at the end of the first four hours of continuous filter operation after the filter has been backwashed or otherwise taken offline.

I, William Cook, under penalties of law that I am the person authorized to sign this form and the information contained herein is true, complete and correct to the best extent of my knowledge.

Keep this report for at least 3 years. This report contains information that is confidential under the Freedom of Information Act. Do not disseminate this information outside the agency without the approval of the appropriate supervisor.

Mail ONE copy of this report to your DEP Regional Office no later than 10 days after the end of the month in which you received this report or no later than 10 days after the end of the reporting period, whichever is sooner.

¹ Percent Removal: $(1 - (\text{Treated Water TOC} + \text{Raw Water TOC})) \times 100$. If > 1 paired sample sets in any month report the average of all individual percent TOC removals. (Example: % TOC Removal = (Average of Set 1 + Average of Set 2) ÷ 2).
² From table at 310-CMR 22.07E(10)(b)2.
³ As listed at 310-CMR 22.07E(10)(a)2 and 310-CMR 22.07E(10)(a)3, summarized as follows:

| Alternative Compliance Criteria | Code Value | Result(s) for Report / RAA - Round Annual Average |
|---|------------|---|
| Source Water TOC < 2.0 mg/L | SWTOC | RAA of source water TOC |
| Treated Water < 2.0 mg/L | TWTOC | RAA of treated water TOC |
| Source Water TOC < 4.0 mg/L AND Alkalinity >= 60 mg/L (as CaCO ₃) AND TTHM/HAA5 <= 0.040/0.030 mg/L | COMBO | RAA of source water TOC, RAA of source water alkalinity, RAA of TTHM and HAA5 |
| TTHM/HAA5 <= 0.040/0.030 mg/L AND only using chlorine | TTHM/HAA5 | RAA of TTHM and HAA5 |
| Source Water SUVA <= 2.0 L/mg-m | SWSUVA | RAA of treated water SUVA |
| Treated Water SUVA <= 2.0 L/mg-m | TWSUVA | RAA of treated water SUVA |
| Softening that lowers alkalinity to <= 60 mg/L (as CaCO ₃) | SOFT50 | RAA of treated water alkalinity |
| Softening that removes >= 10 mg/L (as CaCO ₃) of hardness | SOFT10- | RAA of hardness (as CaCO ₃) removal |

Note: All supplemental measurements and calculations used to meet the alternative criteria must be attached to this report.

⁴ For any month where the system met an alternative compliance criteria a value of 1.0 may be inserted.

Surface water or GWUDI systems ≥ 500 persons
 Monthly source (raw) water TOC samplings required at each surface/GWUDI source to qualify for and remain on reduced THM/TAA5 monitoring.
 Each source must maintain a running annual average source (raw) water TOC level of ≤ 4.0 mg/L (calculated quarterly).
 TOC analysis does not require the use of a Massachusetts or EPA certified laboratory.
 Surface or GWUDI sources using conventional filtration shall each month (unless monitoring is reduced) take one TOC sample at each treatment plant no later than the point of combined filter effluent turbidity monitoring representative of the treated (finished) water, one source (raw) sample prior to any treatment, and one alkalinity source (raw) water sample - at a time representative of normal operating conditions and influent water quality.
 The time between collection of raw and treated (finished) water must not exceed the time it takes to move through the plant.

| Alkalinity analyzed by (check one): <input type="checkbox"/> PWS <input checked="" type="checkbox"/> Lab | | | | | | | |

1. MCL = Maximum Contaminant Level as adopted by the Commonwealth of Massachusetts and represents the maximum acceptable level in drinking water.
2. Recommended limits are suggested levels of materials allowed in water. These may be for aesthetic reasons rather than for human health.
3. Currently there are no limits (recommended or mandated) for this parameter. This is merely presented for guidance.
4. If present, coliform values (in parentheses) are defined as estimated numbers.

¹ DEP Sample Type, Location Code, and DEP Approved Sample Site Location must correspond to the same information on your DEP Total Coliform Sampling Plan.

² SWTR systems HPC must be collected at distribution sites with zero chlorine residual and results reported on the DEP Bacteriological Monthly Report form and on the appropriate SWTR Form.

³ Collection and Analysis: Chlorine residual shall be measured in the field (immediately upon collection) at the same time and location in the distribution system as total coliforms are sampled. Record RD values as 0 (zero).

⁴ Sample Types RS-Residual Distribution Sample, RS-Original Site Report, UP-Upstream Report, DR-Downstream Report, AR-Additional Report, or SS-Special Sample (as determined by DEP).

⁵ All DISINFECTION samples taken and analyzed shall be included in determining compliance, even if that number is greater than the minimum required. If you collect repeat-coliform samples within the distribution system during the month, you must also measure for a detectable chlorine residual at the repeat sites and include those samples. DO NOT include raw water (RW) or plant tap (PT) chlorine residual samples in your calculations.

III. COMPLIANCE REPORTING:

Total # of Samples Collected for Month: 64

Average Chlorine Result of All Samples For Month⁶ (mg/L): 0.65

¹ DEP Sample Type, Location Code, and DEP Approved Sample Site Location must correspond to the same information on your DEP Total Coliform Sampling Plan.
² SWTR systems: FC2 must be collected at distribution sites with zero chlorine residual and results reported on the DEP Bacteriological Monthly Report form and on the appropriate SMTR Form.
³ Collection and Analysis: Chlorine residual shall be measured in the field (immediately upon collection) at the same time and location in the distribution system as total coliforms are sampled. Record MD values as 0 (zero).
⁴ Sample Type: RS-Routine Distribution Sample, RO-Original Site Sample, UR-Upstream Repeat, DR-Downstream Repeat, AR-Additional Repeat, or SS-Special Sample (as determined by DEP).
⁵ All DISTRIBUTION samples taken and analyzed shall be included in determining compliance, even if that number is greater than the minimum required. If you collect repeat/coliform samples within the distribution system during the month, you must also measure for a detectable chlorine residual at the repeat sites and include these samples. DO NOT include raw water (RW) or plant tap (PT) chlorine residual samples in your calculations.

III. COMPLIANCE REPORTING: Total # of Samples Collected for Month: 164 Average Chlorine Result of All Samples For Month⁷ (mg/L): 0.65

⁷ I certify under penalties of law that I am the person authorized to fill out this form, and the information contained herein is true, accurate and complete to the best extent of my knowledge.

Massachusetts Department of Environmental Protection - Drinking Water Program
Disinfection Byproducts Rule Compliance Report

DBPR

I. PWS INFORMATION: Please refer to your DBPR Monitoring Plan to help complete this form.

PWS ID #: 4244001 City/Town: RANDOLPH
 PWS Name: RANDOLPH-HOLBROOK JOINT WATER PWS Class: COM NTNC TNC
 Monitoring Period (YEAR): 2019 Monitoring Period (QUARTER): Q1 (Jan-Mar) Q2 (Apr-Jun) Q3 (Jul-Sep) Q4 (Oct-Dec)

II. FOR SYSTEMS USING CHLORINATION

A. Trihalomethanes (TTHM)

| | | |
|---|-------------------------|------|
| Total Number of TTHM Samples: | Quarterly Average: | µg/L |
| Was the Running Annual Average MCL (80 µg/L) exceeded? Yes <input type="checkbox"/> No <input type="checkbox"/> | Running Annual Average: | µg/L |

B. Haloacetic Acids (HAA5)

| | | |
|---|-------------------------|------|
| Total Number of HAA5 Samples: | Quarterly Average: | µg/L |
| Was the Running Annual Average MCL (60 µg/L) exceeded? Yes <input type="checkbox"/> No <input type="checkbox"/> | Running Annual Average: | µg/L |

C. Chlorine/Chloramines

| | | | | | |
|--|--------------------------------|--|------------------|-------------------------|------------------|
| Total Number of Samples: | Month 1: <u>70</u> <u>JULY</u> | Monthly Averages: (report all 3 months per quarter) | <u>0.55</u> mg/L | Quarterly Average: | <u>0.60</u> mg/L |
| | Month 2: <u>64</u> <u>AUG</u> | | <u>0.65</u> mg/L | | |
| | Month 3: <u>SEPT</u> | | mg/L | | |
| Was the Running Annual Average MRDL (4.0 mg/L) exceeded? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | | | | Running Annual Average: | <u>0.86</u> mg/L |

D. Total Organic Carbon - raw (TOC) (Required for SW or QWUDI systems > 499 seeking or approved to reduce TTHM/HAA5 monitoring.) Plant Name: _____

| | | | | | |
|---|----------|--|------|-------------------------|------|
| Total Number of Samples: | Month 1: | Monthly Averages: (report all 3 months per quarter) | mg/L | Quarterly Average: | mg/L |
| | Month 2: | | mg/L | | |
| | Month 3: | | mg/L | | |
| Was the (4.0 mg/L) threshold exceeded? Yes <input type="checkbox"/> No <input type="checkbox"/> | | | | Running Annual Average: | mg/L |

III. FOR SYSTEMS USING OZONATION - Attach additional sheet(s) to report more than 1 plant

E. Bromate (treated) Plant Name: _____

| | | | | | |
|--|----------|--|------|-------------------------|------|
| Total Number of Samples: | Month 1: | Monthly Averages: (report all 3 months per quarter) | mg/L | Quarterly Average: | mg/L |
| | Month 2: | | mg/L | | |
| | Month 3: | | mg/L | | |
| Was the Running Annual Average MCL (0.010 ug/l) exceeded? Yes <input type="checkbox"/> No <input type="checkbox"/> | | | | Running Annual Average: | mg/L |

F. Bromide (raw) Plant Name: _____

| | | | | | |
|--|----------|--|------|-------------------------|------|
| Total Number of Samples: | Month 1: | Monthly Averages: (report all 3 months per quarter) | mg/L | Quarterly Average: | mg/L |
| | Month 2: | | mg/L | | |
| | Month 3: | | mg/L | | |
| Was the (0.05 mg/l) threshold exceeded? Yes <input type="checkbox"/> No <input type="checkbox"/> | | | | Running Annual Average: | mg/L |

IV. FOR SYSTEMS USING CHLORINE DIOXIDE - Report compliance information on your own Chlorine Dioxide Daily Samples Report

I, William Loshoff, certify under penalties of law that I am the person authorized to fill out this form and the information contained herein is true, accurate and complete to the best extent of my knowledge.

Primary Certified Operator Signature: William Loshoff Date: 9-10-19

| DEFINITIONS | |
|--------------------------|--|
| MONTHLY AVERAGE: | Monthly average = average of all results within the current month. |
| QUARTERLY AVERAGE: | Quarterly Average = average result of all locations sampled during monitoring period |
| RUNNING ANNUAL AVERAGE: | Running Annual Average = Average of 4 quarters. Average of this quarter and three prior consecutive quarterly averages (for systems on quarterly monitoring) |
| TOTAL NUMBER OF SAMPLES: | Total number of samples collected during the monitoring period. |

NOTE: Record and calculate all ND or <MDL results as the number zero (0).

Submit one copy of this form each quarter to your DEP regional office (by Jan 10th, April 10th, July 10th, and Oct 10th of each year)

NA = Not Applicable
 ND = Not Detected
 '<' = Less Than
 '*' = Detection Limit

Approved By: Timothy A. Begley
 Lab Manager / Date

- MCL = Maximum Contaminant Level as adopted by the Commonwealth of Massachusetts and represents the maximum acceptable level in drinking water.
- Recommended limits are suggested levels of materials allowed in water. These may be for aesthetic reasons rather than for human health.
- Currently there are no limits (recommended or mandated) for this parameter. This is merely presented for guidance.
- If present, coliform values (in parentheses) are defined as estimated numbers.

Surface water or GWUDI systems ≥ 500 persons

Monthly source (raw) water TOC samplings required at each surface/GWUDI source to qualify for and remain on reduced THM/HAA5 monitoring.

Each source must maintain a running annual average source (raw) water TOC level of < 4.0 mg/L (calculated quarterly).

TOC analysis does not require the use of a Massachusetts or EPA certified laboratory.

Surface or GWUDI sources using conventional filtration shall each month (unless monitoring is reduced): take one TOC sample at each treatment plant no later than the point of combined filter effluent turbidity monitoring representative of the treated (finished) water, one source (raw) sample prior to any treatment, and one alkalinity source (raw) water sample - at a time representative of normal operating conditions and influent water quality.

The time between collection of raw and treated (finished) water must not exceed the time it takes to move through the plant.

| Alkalinity analyzed by (check one): <input type="checkbox"/> PWS <input checked="" type="checkbox"/> Lab | | | | | | | |
|--|------------|------------|---------------|-------------------------|--------------------|-----------------|--|

- MCL = Maximum Contaminant Level as adopted by the Commonwealth of Massachusetts and represents the maximum acceptable level in drinking water.
- Recommended limits are suggested levels of materials allowed in water. These may be for aesthetic reasons rather than for human health.
- Currently there are no limits (recommended or mandated) for this parameter. This is merely presented for guidance.
- If present, coliform values (in parentheses) are defined as estimated numbers.

Mail ONE copy of this report to your DEP Regional Office no later than 10 days after the end of the month in which you received this report or no later than 10 days after the end of the reporting period, whichever is sooner.

¹ Percent Removal: $(1 - (\text{Treated Water TOC} + \text{Raw Water TOC})) \times 100$. If > 1 paired sample sets in any month report the average of all individual percent TOC removals (Example: % TOC Removal = (Average of Set 1 + Average of Set 2) + 2).

² From table at 310-CMR 22.07E(10)(b)2.

³ As listed at 310 CMR 22.07E(10)(a)2 and 310 CMR 22.07E(10)(a)3, summarized as follows:

| Alternative Compliance Criteria | Code Value | Result(s) to Report (RAA - Running Annual Average) |
|---|------------|---|
| Source Water TOC < 2.0 mg/L | SWTOC | RAA of source water TOC |
| Treated Water < 2.0 mg/L | TWTOC | RAA of treated water TOC |
| Source Water TOC < 4.0 mg/L AND Alkalinity > 60 mg/L (as CaCO ₃) AND TTHM/HAA5 ≤ 0.040/0.030 mg/L | COMBO | RAA of source water TOC, RAA of source water alkalinity, RAA of TTHM and HAA5 |
| TTHM/HAA5 ≤ 0.040/0.030 mg/L AND only using chlorine | TTHM/HAA5 | RAA of TTHM and HAA5 |
| Source Water SUVA ≤ 2.0 L/mg-m | SWSUVA | RAA of treated water SUVA |
| Treated Water SUVA ≤ 2.0 L/mg-m | TWSUVA | RAA of treated water SUVA |
| Softening that lowers alkalinity to < 60 mg/L (as CaCO ₃) | SOFT60 | RAA of treated water alkalinity |
| Softening that removes ≥ 10 mg/L (as CaCO ₃) of hardness | SOFT10 | RAA of hardness (as CaCO ₃) removal |

Note: All supplemental measurements and calculations used to meet the alternative criteria must be attached to this report.

⁴ For any month where the system met an alternative compliance criteria a value of 1.0 may be inserted.

PWS INFORMATION

PWSID#: PWS Name: PWS Town:
 Treatment Plant Name: Reporting Period → Month: Year:
 Total # of Filters at Treatment Plant¹:

MONTHLY REPORTING

Filtered Water Turbidity Measured: Individual Filter Effluent (IFE) or Combined Filter Effluent (CFE)²
 Analytical Method: SM 2130B EPA 180.1 GLI Method 2 (Great Lakes)

| | | |
|----|---|--|
| 1. | Was each filter monitored continuously? If continuous monitoring equipment is installed and if it functioned continuously throughout the month, the correct answer is "yes". If continuous monitoring equipment is not installed or did not function continuously throughout the month, the correct answer is "no". | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No |
| 2. | Were measurements recorded every 15 minutes? If measurements on each filter were performed throughout the month and the measurements were recorded every 15 minutes when water was being filtered, the correct answer is "yes". If there was a failure in any continuous monitor, the correct answer is "no". | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No |
| 3. | Was there a failure of continuous turbidity monitoring equipment? If grab samples were obtained due to an equipment failure, the correct answer is "yes". If there was no equipment failure during the month, the correct answer is "no". Systems serving a population of at least 10,000 must conduct grab samples every 4 hours in lieu of continuous monitoring, but for no more than 5 working days following the failure of equipment. Systems serving a population less than 10,000 may use grab samples for up to 14 working days. List filter # and date(s) grab samples collected: Comment: | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| 4. | Were individual filter levels greater than 1.0 NTU in two consecutive measurements? If "yes", systems serving a population of at least 10,000 must produce a filter profile within 7 days of the exceedance or report the obvious reason for the exceedance in the table below. The filter profile is not required to be submitted unless requested, only report that the filter profile has been done. Systems serving a population less than 10,000 shall report exceedance information in the table below. List date(s) a filter profile was produced: | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| 5. | Were individual filter levels greater than 0.5 NTU in two consecutive measurements after the filter has been online for more than 4 hours? If "yes", systems serving a population of at least 10,000 must produce a filter profile within 7 days of the exceedance or report the obvious reason for the exceedance in the table below. The filter profile is not required to be submitted unless requested, only report that the filter profile has been done. Systems that serve a population less than 10,000 have no required action. List date(s) a filter profile was produced: | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| 6. | Were individual filter levels greater than 1.0 NTU in two consecutive measurements in three consecutive months? If "yes", the system must conduct a self-assessment of the filter within 14 days of the exceedance. The system is to report that a self-assessment has been completed. Systems with 2 filters that monitor CFE in lieu of IFE must do both filters. Refer to 310 CMR 22.20D(8)(b)(2) and 310 CMR 22.20F(7)(d)(2) for required filter self-assessment report content. List date(s) a filter self-assessment was triggered: Report(s) Completed: | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| 7. | Were individual filter levels greater than 2.0 NTU in two consecutive measurements in two consecutive months? If "yes", systems serving a population of at least 10,000 must schedule a Comprehensive Performance Evaluation (CPE) within 30 days of the exceedance and submit the report within 90 days. A system serving a population less than 10,000 must schedule a CPE within 60 days of the exceedance and submit the report within 120 days. List date(s) the CPE was triggered: | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |

For each 'Yes' response to question #4, #5, #6 or #7 above: Report the following information in the table below.

| Filter # | Turbidity Result (NTU) | Date | Reason for Exceedance (if known) Attach additional documents as necessary for detailed explanations. |

1. Systems shall conduct continuous turbidity monitoring of the filter effluent for each individual filter at the filtration facility and record turbidity measurements every 15-minutes. Record the actual turbidity result at the specified interval of time. Do not average turbidity measurements. Individual filter turbidity records must be retained for 3 years and kept on file for MassDEP review.
2. Systems serving less than 10,000: If the treatment system has only one or two filters, the supplier may conduct continuous monitoring of the CFE turbidity in lieu of individual filter effluent (IFE) turbidity monitoring. If there are two filters, a continuous turbidity monitor can be installed on the combined filter effluent. If a CFE problem appears, follow-up action must then be completed on both filters.
3. Enter the highest daily 15-minute interval turbidity measurement recorded for the filter specified.
4. Enter the highest daily 15-minute interval turbidity measurement recorded at the end of the first four hours of continuous filter operation after the filter has been backwashed or otherwise taken offline.

III. COMPLIANCE REPORTING: Total # of Samples Collected for Month: **70** Average Chlorine Result of All Samples For Month (mg/L): **0.35**

¹ DEP Sample Type, Location Code#, and DEP Approved Sample Site Location must correspond to the same information on your DEP Total Coliform Sampling Plan.
² SWTR systems: HPC must be collected at distribution sites with zero chlorine residual and results reported on the DEP Bacteriological Monthly Report form and on the appropriate SWTR Form.
³ Collection and Analysis: Chlorine residual shall be measured in the field (immediately upon collection) at the same time and location in the distribution system as total coliforms are sampled. Record ND values as 0 (zero).
⁴ Sample Type: RS-Routine Distribution Sample, RO-Original Site Repeat, UR-Upstream Repeat, DR-Downstream Repeat, AR-Additional Repeat, or SS-Special Sample (as determined by DEP).
⁵ All DISTRIBUTION samples taken and analyzed shall be included in determining compliance, even if that number is greater than the minimum required. If you collect repeat coliform samples within the distribution system during the month, you must also measure for a detectable chlorine residual at the repeat sites and include these samples. DO NOT include raw water (RW) or plant tap (PT) chlorine residual samples in your calculations.

I certify under penalties of law that I am the person authorized to fill out this form and the information contained herein is true, accurate and complete to the best of my knowledge.

DBPR

I. PWS INFORMATION Please refer to your DBPR Monitoring Plan to help complete this form.

PWS ID #: 4244001 City/Town: RANDOLPH
 PWS Name: RANDOLPH-HOLBROOK JOINT WATER PWS Class: COM NTNC TNC
 Monitoring Period (YEAR): 2019 Monitoring Period (QUARTER): Q1 (Jan-Mar) Q2 (Apr-Jun) Q3 (Jul-Sep) Q4 (Oct-Dec)

II. FOR SYSTEMS USING CHLORINATION

A. Trihalomethanes (TTHM)
 Total Number of TTHM Samples: _____ Quarterly Average: _____ µg/L
 Was the Running Annual Average MCL (80 µg/L) exceeded? Yes No Running Annual Average: _____ µg/L

B. Haloacetic Acids (HAA5)
 Total Number of HAA5 Samples: _____ Quarterly Average: _____ µg/L
 Was the Running Annual Average MCL (60 µg/L) exceeded? Yes No Running Annual Average: _____ µg/L

C. Chlorine/Chloramines
 Total Number of Samples: _____ Monthly Averages: _____ mg/L
 Month 1: 20 JULY 0.55
 Month 2: _____ Aug (report all 3 months per quarter) _____
 Month 3: _____ SEPT. _____
 Quarterly Average: 0.55 mg/L
 Was the Running Annual Average MRDL (4.0 mg/L) exceeded? Yes No Running Annual Average: 0.85 mg/L

D. Total Organic Carbon - raw (TOC) (Required for SW or GWUDI Plant Name: _____
systems > 499 seeking or approved to reduce THM/HAA5 monitoring.)
 Total Number of Samples: _____ Monthly Averages: _____ mg/L
 Month 1: _____ (report all 3 months per quarter) _____
 Month 2: _____ _____
 Month 3: _____ _____
 Quarterly Average: _____ mg/L
 Was the (4.0 mg/L) threshold exceeded? Yes No Running Annual Average: _____ mg/L
(Attach additional sheet(s) to report more than 1 plant)

III. FOR SYSTEMS USING OZONATION (Attach additional sheet(s) to report more than 1 plant)

E. Bromate (treated) Plant Name: _____
 Total Number of Samples: _____ Monthly Averages: _____ mg/L
 Month 1: _____ (report all 3 months per quarter) _____
 Month 2: _____ _____
 Month 3: _____ _____
 Quarterly Average: _____ mg/L
 Was the Running Annual Average MCL (0.010 µg/l) exceeded? Yes No Running Annual Average: _____ mg/L

F. Bromide (raw) Plant Name: _____
Required for systems seeking or approved to reduce Bromate monitoring
 Total Number of Samples: _____ Monthly Averages: _____ mg/L
 Month 1: _____ (report all 3 months per quarter) _____
 Month 2: _____ _____
 Month 3: _____ _____
 Quarterly Average: _____ mg/L
 Was the (0.05 mg/l) threshold exceeded? Yes No Running Annual Average: _____ mg/L

IV. FOR SYSTEMS USING CHLORINE DIOXIDE (Report compliance information on your chlorine dioxide by-product samples.)

I hereby certify under penalty of law that I am the person authorized to fill out this form and the information contained herein is true, accurate and complete to the best of my knowledge.

Primary Certified Operator Signature: William Costello Date: 8-13-19

| DEFINITIONS | |
|--------------------------|--|
| MONTHLY AVERAGE: | Monthly average = average of all results within the current month. |
| QUARTERLY AVERAGE: | Quarterly Average = average result of all locations sampled during monitoring period |
| RUNNING ANNUAL AVERAGE: | Running Annual Average = Average of 4 quarters. Average of this quarter and three prior consecutive quarterly averages (for systems on quarterly monitoring) |
| TOTAL NUMBER OF SAMPLES: | Total number of samples collected during the monitoring period. |

NOTE: Record and calculate all ND or <MDL results as the number zero (0).

Submit one copy of this form each quarter to your DEP regional office (by Jan 10th, April 10th, July 10th, and Oct 10th of each year)
